Seminar

Predicting and Monitoring COVID-19 contagion

Franco Peracchi

GeorgeTown University, EIEF and University of Rome Tor Vergata

Paolo Giudici

University of Pavia with Centre for European Policy Studies

Abstract. The two talks will present econometric and statistical methods aimed at estimating, monitoring and predicting the evolution of the contagion curve of the COVID-19. The methodology will be exemplified for the countries most hit: United States, Spain, Italy, France, Germany and China.

To facilitate open discussion, each talk will last 20 minutes, followed by 10 minutes discussion and possible further discussion at the end.

Material. Draft papers of the talks available at:
